To Whom It May Concern,

I am writing to wholeheartedly recommend Divyam Gupta, who worked at Hiry as a Full-Stack Developer. In every aspect of his role, Divyam proved himself to be an exceptional engineer with high ownership, reliable, and consistently delivering work far beyond expectations.

During his time at Hiry, he contributed across the entire stack with confidence and clarity. Whether it was architecting new features, improving existing systems, or jumping into complex debugging scenarios, Divyam approached every challenge with a level of maturity and technical sharpness that is rare for his experience level.

What stood out most about Divyam was his sense of responsibility. He never needed follow-ups or hand-holding. If he committed to something, it was delivered on time and with great attention to detail. He communicates clearly, asks the right questions, and consistently pushes for better solutions rather than settling for the easiest one.

Beyond his technical skill, he is simply a great person to work with. He is humble, thoughtful, and genuinely cares about the product. His presence raised the bar for the rest of the team.

I am confident that Divyam will be a tremendous asset to any organisation he joins. I recommend him without hesitation and would gladly work with him again in the future.

Sincerely,

A handwritten signature in blue ink that reads "Julius K".
